

LEONARDO RIBEIRO

+55 (62) 98464-8545 ◊ Goiânia, Brazil

leonardo.oliveira.palmeira@gmail.com ◊ [linkedin.com/in/leonardo-ribeiro-oliveira](https://www.linkedin.com/in/leonardo-ribeiro-oliveira)

PROFILE

Software developer with four years of experience, focused on .NET, and strong knowledge of Angular, React, Tailwind, and Bootstrap for responsive interfaces. Experience with SQL Server and MySQL databases, query optimization, and API development. Skilled in Git, Bitbucket, Azure, and AWS for version control, continuous integration, and deployment. Also proficient in Python and Django, natural language processing (NLP), and artificial intelligence — developing semantic search solutions and chatbots. Strong ability to integrate internal and external systems, ERPs, and CRMs, ensuring scalable, secure, and efficient solutions.

EDUCATION

Software Engineering, Federal University of Goiás

2022 – 2026

SKILLS

Backend Development	.NET Core, ASP.NET Core, Entity Framework Core, SQL Server, MySQL
Frontend Development	Angular, React, Tailwind, Bootstrap, UX/UI design
Cloud & DevOps	AWS, Azure DevOps, Git, Bitbucket, CI/CD pipelines
Data & AI	Python, Django, Transformers, LangChain, HuggingFace, Torch, NLP
Systems Integration	REST APIs, ERPs, CRMs, Google Maps, payment gateways, SMTP
Soft Skills	Business mindset, teamwork, growth mindset

EXPERIENCE

Software Engineer

2025 – Present

Stretto

Irvine, CA, United States

- Upgraded critical libraries and frameworks with stability and security issues, migrating to newer versions and refactoring code for compatibility and safety.
- Optimized infrastructure in Azure DevOps, reducing operational costs and improving CI/CD pipeline efficiency.
- Collaborated directly with stakeholders from the United States and other countries, ensuring technical and strategic alignment across global teams.
- Implemented modern software engineering practices focused on reliability, performance, and code sustainability in complex corporate environments.

Web Developer

2025 – 2025

MidiaSim / CEIA

São Paulo, SP, Brazil

- Developed web systems using Laravel, PHP, and MySQL with API integrations.
- Built WordPress websites, WooCommerce stores, and SEO-optimized landing pages.
- Managed hosting infrastructure, ensuring scalability and security.
- Used Git, Bitbucket, and Azure DevOps for collaboration and CI/CD automation.

Software Engineer

2023 – 2025

Senior Sistemas

São Paulo, SP, Brazil

- Developed and integrated APIs connecting CRM, Sales, After-sales, and ERP systems (UAU, MEGA).
- Maintained and optimized legacy systems, improving database performance and scalability.
- Integrated external services (Google Maps, ERPs), ensuring reliable data flow between systems.

- Specialized in .NET Core, Angular, SQL optimization, and deployment using AWS/Azure.

Developer (Data Science & AI)

CIAP

2024 – 2025

Goiânia, GO, Brazil

- Developed NLP and semantic search systems for analyzing public policy documents.
- Built scalable backends using Django, PostgreSQL, MongoDB, and REST APIs.
- Implemented chatbots and search tools with LangChain, HuggingFace, Torch, and ChromaDB.
- Delivered interactive dashboards with Streamlit and advanced document ingestion pipelines.

Junior Developer

Tahto

2022 – 2023

Goiânia, GO, Brazil

- Developed SIM card management systems and dynamic forms using .NET Core and jQuery.
- Integrated SQL Server databases with optimized queries for improved performance.
- Improved data accuracy and inventory management processes.
